www.onlyus.com.pk

Onlyus Enterprises is a trusted manufacturer and supplier of high-quality dental, surgical, implant, diagnostic, and holloware instruments. With a commitment to precision, durability, and innovation, we provide products that meet the highest industry standards and support professionals in delivering exceptional care.

Our mission is to combine advanced manufacturing techniques with skilled craftsmanship to produce instruments that offer reliability and performance in every use. From dental and surgical tools to specialized implant and diagnostic equipment, each product is crafted with attention to detail and a focus on long-term value.

We pride ourselves on maintaining strict quality control measures, ensuring that every instrument reflects our dedication to excellence. As a customer-focused company, we prioritize timely delivery, competitive pricing, and responsive service to meet the diverse needs of clinics, hospitals, and distributors worldwide.

Onlyus Enterprises continues to grow by building strong relationships, expanding our product range, and staying aligned with the evolving demands of the medical field. ***Our goal*** is to remain a trusted partner, providing superior instruments that professionals can rely on with confidence.

ALUMINIUM - BACK SURFACE

RHODIUM - FRONT SURFACE

1 - *stainless steel frame*

2 - *sealed with waterproof seal*

3 - *reflective aluminum-coated back surface*

4 - *reflective rhodium-coated front surface*

In mirrors with rhodium-coated front surface, the reflective surface is on the upper part of the mirror for precise and sharp reflected images. It is recommended to avoid contact between the mirror and abrasive surfaces. When cleaning, it also is recommended to avoid immersing the mirror in an ultrasonic tank.

TIN

TIN (titanium nitride), which has always been very fascinating for its shimmering gold coloring, was the first coating to be successfully used in dentistry due to its high biocompatibility. The TIN coating significantly increases the micro-hardness of the instrument. These features, together with a low coefficient of friction, render it the ideal coating for all the instruments that come in contact with any composites and cements.

Extracting forceps, Meissner

With only three pliers you can extract any tooth in the upper or lower arch, on the left or right side.

A new frontier has been achieved. Lascod has created the series of Meissner pliers, keeping in mind the importance of easy cleaning and sanitation. The smooth handle and, above all, the fact that they can be totally and easily dismantled ensures maximum hygiene even in those parts that are usually inaccessible.

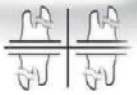

Extracting forceps, Meissner

Pk Thomas Spatulas

The complete set of PK THOMAS spatulas used for waxing is offered with a colored handle (green, gold, blue, red, steel) made of anodized aluminum to facilitate identification in the dental laboratory. The aluminum handle with a larger diameter (8 mm) makes the instrument lightweight, sensitive and precise, all important features to reproduce the correct anatomical morphology of natural teeth.

Impression trays

The absence of solder and retention edges facilitate the removal of residual material which is a breeding ground for blood, spores and bacteria in the mouth.

EXPLOIT has been designed bearing in mind the oral anatomy and an optimal distribution of the impression material, thus offering greater comfort to the patient.

Perforated and non-perforated EXPLOIT trays are compatible with all impression materials and are available with a micro-sand blasted satin finish for even more retention.

Holes Impression trays

Holes Impression Trays

Holes Impression Trays are manufactured from premium-quality material to deliver accurate, stable, and consistent dental impressions. The precisely placed holes ensure strong mechanical retention of impression material, preventing displacement and enhancing overall impression accuracy.

These trays feature a rigid and well-balanced design that maintains shape under pressure, ensuring dependable results during clinical procedures. Smooth edges and an ergonomic form provide patient comfort and ease of use for practitioners.

Suitable for a wide range of impression materials, these trays are available in multiple sizes for both upper and lower arches. Ideal for professional use in dental clinics, hospitals, and laboratories, they combine durability, reliability, and precision for everyday dental applications.

HEMOSTATIC MOSQUITO

SIZE

12CM	14CM

HEMOSTATIC STRAIGHT

- Made from premium stainless steel for durability
- Firm and secure grip for precise control
- Corrosion and rust resistant
- Available in multiple sizes and tip styles
- Autoclavable and reusable

#OU-1011

HEMOSTATIC CURVED

- Transverse serrations ensure steady hold on tissues
- Fine tips for accurate clamping and hemostasis
- Curved design for easy access in narrow areas
- Crafted from high-quality stainless steel
- Fully autoclavable for effective sterilization.

#OU-1012

KELLY STRAIGHT

- Precision-crafted from surgical grade stainless steel
- Strong grip for effective bleeding control
- Resistant to corrosion and repeated sterilization
- Offered in straight and curved patterns.

#OU-1013

CRILE CURVED

- Designed for precision cutting and tissue handling
- Crafted from medical-grade stainless steel
- Provides controlled and firm grip
- Anti-rust and easy to sterilize.

#OU-1014

CRILE STRAIGHT

- Smooth joint mechanism for easy handling
- Sharp and precise tips for accurate performance
- Resistant to wear, corrosion, and frequent sterilization
- Suitable for both general and fine surgical use.

#OU-1015

KELLY CURVED

- Manufactured from high-grade stainless steel
- Firm and comfortable grip for delicate procedures
- Rust and corrosion resistant finish
- Available in different sizes and patterns
- Sterilizable and reusable

- Made from premium stainless steel for durability.
- Double-ended design for shallow or deep retraction.
- Smooth surface prevents tissue damage.
- Commonly used in general and abdominal surgeries.

ARMY-NAVY

#OU-1144

- Corrosion-resistant stainless steel construction.
- Provides clear exposure of the surgical field.
- Ergonomic handle ensures a secure grip.

ARMY-NAVY

#OU-1145

- Strong and lightweight for effortless handling.
- Dual-end design offers versatility in retraction depth.
- Polished finish allows easy cleaning and sterilization.

ARMY-NAVY

#OU-1146

- Dual-end pattern provides surgical flexibility.
- Easy to sterilize and maintain.
- Offers consistent retraction throughout the procedure.

ARMY-NAVY

#OU-1149

- Constructed from rustproof stainless steel.
- Ensures steady and gentle tissue separation.
- Comfortable grip reduces surgeon fatigue.

ARMY-NAVY

#OU-1148

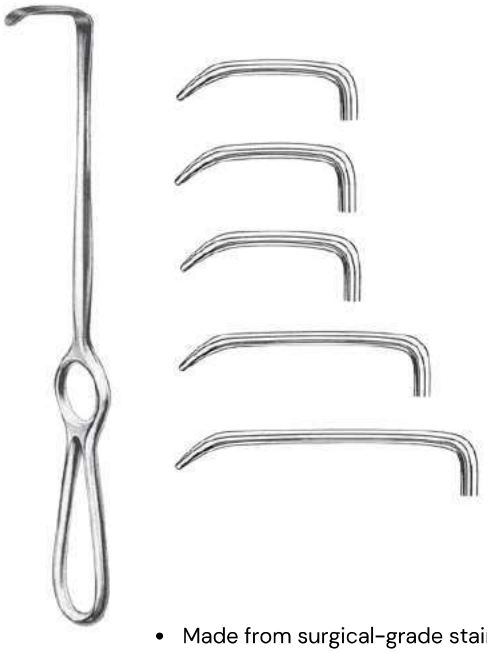

- Balanced design ensures precise control.
- Durable material resists bending and wear.
- Smooth edges minimize tissue trauma.

ARMY-NAVY

ONLYUS

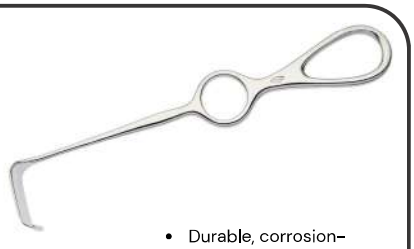

KOCHER LENGENBECK RETRACTORS

KOCHER LENGENBECK

#OU-1150

- Made from surgical-grade stainless steel for strength.
- Provides deep and firm tissue retraction.
- Curved blade design ensures clear visibility.
- Commonly used in orthopedic and trauma surgeries.

KOCHER LENGENBECK

#OU-1151

- Durable, corrosion-resistant construction.
- Smooth surface prevents tissue injury.
- Ergonomic handle allows precise control.

KOCHER LENGENBECK

#OU-1152

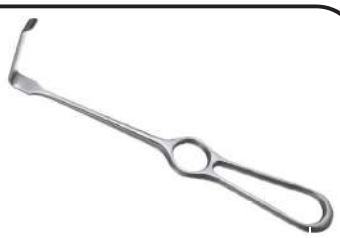

- Heavy-duty stainless steel for long-lasting use.
- Offers strong grip for deep surgical retraction.
- Balanced design enhances stability and comfort.

KOCHER LENGENBECK

#OU-1155

- Rustproof material ensures durability.
- Designed for deep and precise retraction.
- Non-slip handle gives excellent control.

KOCHER LENGENBECK

#OU-1154

- Robust and reliable stainless steel build.
- Provides wide retraction with minimal effort.
- Smooth edges protect soft tissues.

KOCHER LENGENBECK

#OU-1153

- Polished finish allows easy sterilization.
- Curved blade ensures accurate tissue separation.
- Comfortable handle reduces hand fatigue.

ONLYUS

MOYNIHAN RETRACTORS

- Made from high-quality stainless steel for durability.
- Provides excellent exposure of deep surgical areas.
- Smooth, curved blade prevents tissue damage.
- Commonly used in abdominal and general surgeries.

MOYNIHAN

#OU-1156

MOYNIHAN

#OU-1157

- Corrosion-resistant stainless steel construction.
- Balanced design allows precise control.
- Ergonomic handle ensures a firm, comfortable grip.

- Strong and rustproof build for long-term use.
- Curved blade offers deep and stable retraction.
- Polished surface allows easy sterilization.

MOYNIHAN

#OU-1158

MOYNIHAN

#OU-1161.

- Precision-crafted for accuracy and stability.
- Curved design ensures better access in deep cavities.
- Resistant to corrosion and frequent sterilization.

MOYNIHAN

#OU-1160

- Sturdy stainless steel for dependable performance.
- Smooth edges prevent accidental injury.
- Comfortable handle for prolonged surgeries.

MOYNIHAN

#OU-1159

- Provides secure retraction with minimal tissue trauma.
- Lightweight and easy to handle.
- Designed for deep surgical exposure.

ONLYUS

JOLL THYROID RETRACTORS

- Made from surgical-grade stainless steel for long-lasting durability.
- Specifically designed for thyroid and neck surgeries.
- Provides gentle yet firm tissue retraction.
- Smooth edges minimize trauma to delicate tissues.

JOLL THYROID

#OU-1162

JOLL THYROID

#OU-1163

- Corrosion-resistant stainless steel construction.
- Curved design ensures optimal visibility of the surgical site.
- Ergonomic handle offers comfortable, non-slip grip.

JOLL THYROID

#OU-1164

- Lightweight for easy handling during delicate operations.
- Ensures precise and controlled tissue separation.
- Polished finish allows easy cleaning and sterilization.

JOLL THYROID

#OU-1167

- High-quality, rustproof construction for repeated use.
- Delivers deep retraction with minimal tissue trauma.
- Easy to sterilize and maintain.

JOLL THYROID

#OU-1166

- Smooth and curved blades prevent accidental injury.
- Provides steady and consistent retraction.
- Comfortable handle enhances surgical precision.

JOLL THYROID

#OU-1165

- Strong stainless steel ensures stability and strength.
- Designed for safe retraction of neck tissues.
- Balanced structure reduces hand fatigue.

SETS

SET

#OU-1192

- Complete sets including essential surgical instruments
- Made from high-quality stainless steel for durability
- Instruments are autoclavable and reusable
- Designed for precision and efficiency in surgeries

SET

#OU-1193.

- Comprehensive surgical kits for various procedures
- Includes scissors, forceps, retractors, and more
- Corrosion-resistant stainless steel construction

SET

#OU-1194

- All-in-one surgical sets for clinical and hospital use
- High-grade stainless steel ensures long-lasting performance
- Instruments sterilizable for repeated use

SET

#OU-1197

- Professionally organized surgical kits for efficient workflow
- Includes essential tools for precise surgical procedures
- High-quality stainless steel for strength and hygiene

SET

#OU-1196

- Complete instrument sets for minor and major surgeries
- Stainless steel construction resists rust and wear
- Reusable and autoclavable for consistent performance

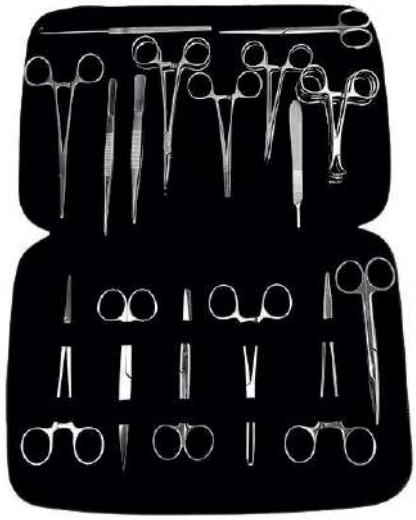

SET

#OU-1195

- Versatile surgical sets suitable for multiple applications
- Precision-engineered instruments for accuracy and safety

FIBER OPTIC LARNGOSCOPES

LARNGOSCOPE

#OU-1204

- Designed for clear visualization of the larynx
- High-quality stainless steel blade ensures durability
- Ergonomic handle for comfortable grip
- Reusable and easy to sterilize

LARNGOSCOPE

#OU-1205

- Provides excellent illumination and visibility during intubation
- Curved or straight blade options for various procedures
- Lightweight and balanced for steady control
- Corrosion-resistant and autoclavable for repeated use

LARNGOSCOPE

#OU-1206

- Ideal for safe and precise airway management
- Smooth, polished surface reduces tissue trauma
- Durable stainless steel construction
- Easy to clean and sterilize after each use

LARNGOSCOPE

#OU-1209

- Curved blade provides better access in difficult intubations
- Sturdy stainless steel ensures long-lasting performance
- Lightweight handle for ease of use
- Fully autoclavable and easy to maintain

LARNGOSCOPE

#OU-1208

- Straight and curved blades available for versatile use
- Reliable grip ensures steady control during procedures
- Polished stainless steel for hygiene and durability
- Suitable for repeated sterilization and long-term use

LARNGOSCOPE

#OU-1207

- Helps achieve optimal exposure of the vocal cords
- Ergonomic design for comfortable handling
- High-quality, corrosion-resistant stainless steel
- Reusable and autoclavable for clinical use

ONLYUS

CONVENTIONAL LARNGOSCOPES

LARNGOSCOPE

#OU-1210

- Straight blade design for standard laryngoscopy procedures
- Smooth finish minimizes tissue irritation
- Durable stainless steel construction
- Reusable and simple to sterilize

LARNGOSCOPE

#OU-1211

- Provides clear airway visualization for safe intubation
- Ergonomic handle ensures steady control
- Polished stainless steel resists corrosion
- Suitable for repeated clinical use

LARNGOSCOPE

#OU-1212

- Versatile laryngoscope for adult and pediatric use
- Curved or straight blade options for different techniques
- Lightweight, durable stainless steel construction

LARNGOSCOPE

#OU-1215

- Designed for efficient and safe airway management
- Smooth, polished blade reduces trauma during insertion
- Balanced handle for precise control
- Reusable and autoclavable for repeated procedures

LARNGOSCOPE

#OU-1214

- High-quality laryngoscope for reliable intubation
- Provides clear view of the vocal cords
- Durable stainless steel construction
- Easy to sterilize and maintain for repeated use

TC NEEDLE HOLDER & TC SCISSORS

TC NEEDLE HOLDER

#OU-1222.

- Used to hold needles during suturing.
- TC inserts give strong grip.
- Provides control and precision.
- Durable and long-lasting instrument.

TC NEEDLE HOLDER

#OU-1223

- Holds needle firmly during surgery.
- TC tips prevent slipping.
- Ensures accurate stitching.
- Made for long-term use.

TC NEEDLE HOLDER

#OU-1224

- Used for safe needle handling.
- TC jaws give extra strength.
- Offers smooth suturing control.
- Resistant to wear and tear.

TC SCISSORS

#OU-1227

- Used for cutting tissues and sutures.
- TC blades ensure sharpness and durability.
- Provide clean and precise cuts.
- Resistant to corrosion and wear.

TC SCISSORS

#OU-1226

- Surgical scissors with TC inserts.
- Stay sharp for a long time.
- Give smooth and accurate cutting.
- Strong and long-lasting tool.

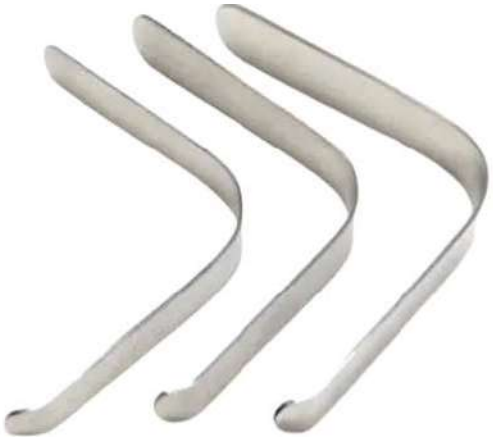

TC SCISSORS

#OU-1225

- Designed for fine surgical cutting.
- TC edges prevent dullness.
- Offer better grip and control.
- Ideal for long-term surgical use.

TONGUE DEPRESSOR

TOUNGE DEPRESSOR

#OU-1228

- Made from durable, high-quality wood or stainless steel
- Flat design allows safe tongue retraction
- Smooth edges prevent patient discomfort
- Single-use or autoclavable, depending on material

TOUNGE DEPRESSOR

#OU-1229

- Designed for safe and effective tongue depression
- Comfortable grip for controlled use
- High-quality stainless steel or medical-grade wood
- Reusable and easy to sterilize

TOUNGE DEPRESSOR

#OU-1230

- Ideal for routine throat and oral inspections
- Made from durable, corrosion-resistant materials
- Smooth, rounded edges ensure patient safety
- Lightweight and easy to handle

TOUNGE DEPRESSOR

#OU-1233

- Used to hold down the tongue for oral examinations
- Made from high-quality stainless steel or medical-grade wood
- Smooth, rounded edges prevent tissue injury
- Lightweight, durable, and easy to sterilize

TOUNGE DEPRESSOR

#OU-1232

- Provides clear access to the oral cavity during examination
- Ergonomic design for comfortable handling
- Polished surface reduces risk of irritation
- Reusable and easy to clean

TOUNGE DEPRESSOR

#OU-1231

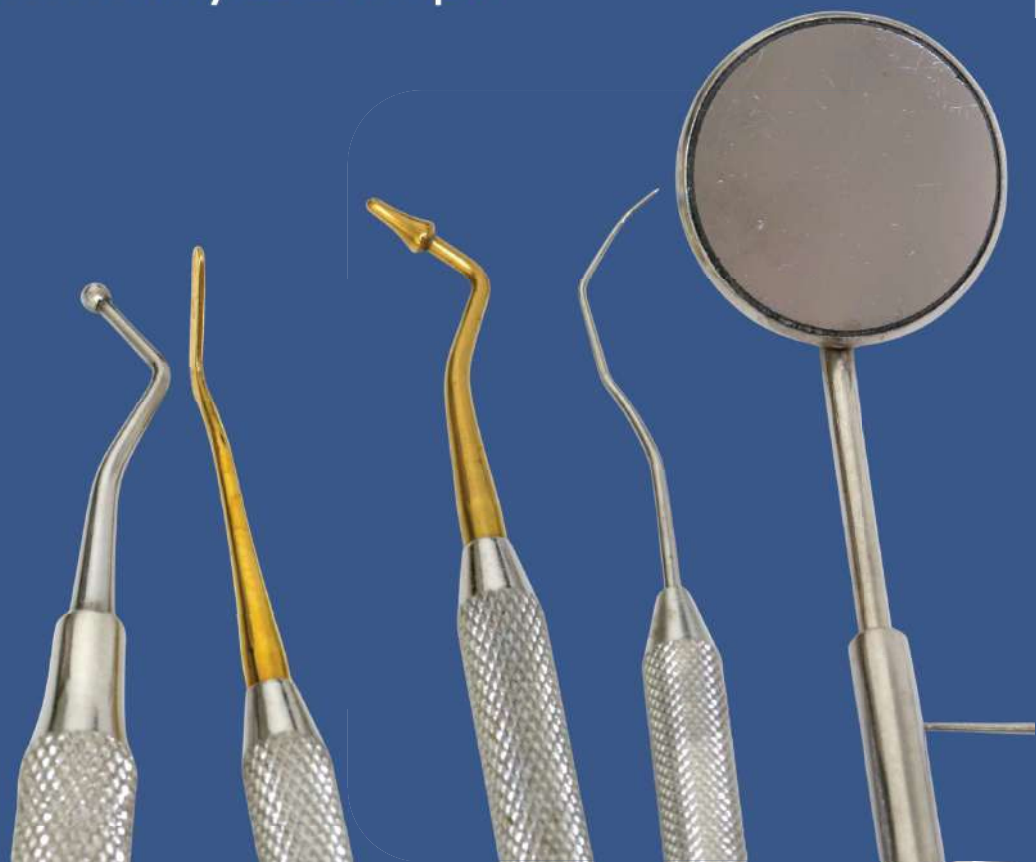

- Ideal for routine oral and throat inspections
- Smooth, rounded tip ensures patient safety
- Lightweight and durable construction
- Autoclavable for repeated clinical use

PUNCH

PUNCH

#OU-1264

- Manufactured from high-quality stainless steel for strength and longevity.
- Sharp cutting edge ensures clean and precise tissue removal.
- Comfortable grip handle allows controlled and steady operation.
- Suitable for biopsy, dermatological, and minor surgical procedures.

PUNCH

#OU-1265

- Durable stainless steel construction.
- Ensures clean tissue cutting.
- Lightweight and easy to handle.
- Suitable for clinical and lab use.

PUNCH

#OU-1266

- Precision-ground tip for accurate results.
- Rust-resistant stainless steel build.
- Smooth operation with minimal effort.
- Ideal for biopsy and minor procedures.

PUNCH

#OU-1269

- Made with durable stainless steel for consistent performance and reliability.
- Delivers accurate circular cuts with minimal tissue trauma.

PUNCH

#OU-1268

- High-quality stainless steel for durability.
- Sharp edge gives clean, precise cuts.
- Non-slip handle for better control.
- Easy to sterilize and reuse.

PUNCH

#OU-1267

- Strong stainless steel body.
- Delivers smooth, accurate punches.
- Comfortable grip design.
- Safe for repeated sterilization.
